AngioScreen[®]

A screening that can save your life.

What is AngioScreen?

Offered exclusively by Hackensack Meridian Health, AngioScreen is a revolutionary, new vascular screening designed to provide you with information about your circulation and risk for heart attack and stroke.

Every 30 seconds someone suffers a heart attack, and every 45 seconds, another has a stroke. ***Because a stroke or heart attack can often occur without warning or symptoms, having the facts about your vascular health is a vital first step in prevention.***

Immediately following the screening, you will be provided with a full color report of your results, educational material and a consultation with a Registered Nurse. We encourage you to share your results with your personal physician.

Vascular Screening

What you learn can save your life
